HARMONYS

IP/POE Public Announcement
and Programmable Bell Audio System

Harmonys is a **range of audio and visual equipment** that enables you to program bell sounds, play music, broadcast information, and provide audio and visual alarms.

Harmonys solutions adapt and evolve to meet your needs.

Our **audio and visual systems** are especially suited to the education and industrial sectors.

IP TECHNOLOGY

The Harmonys range communicates with your IP computer network, which offers a number of benefits:

- **Simple installation:** use of the existing computer network
- **POE supply:** simple cabling
- **Quick and easy configuration** of equipment via Bodet's Sigma software

BROADCAST YOUR MESSAGES

Sounders play pre-installed or custom melodies as well as general announcements. Harmonys flash models meet the standards required for public-access buildings (ERP). The device emits two types of luminous flashes synchronised on the sounders, one for alert mode and one for bell mode.

COMMUNICATE EFFICIENTLY

The microphone can be used to broadcast live or recorded announcements. You can also send messages from a smartphone.

8 or 15 zones

Free app "Harmonys Talk"

TRIGGER THE BROADCASTING OF YOUR MESSAGES AND ALERTS

Alerts (Lockdown), evacuation, panic alarm and messages can be sent using the control box, remote control, GSM or the Harmonys Notify app.

The Harmonys system also allows you to issue an alert using external equipment, such as a burglar alarm.

THE ADVANTAGES OF HARMONYS

- **Personalised bell sounds** for each sounder or a number of sounders (*certain zones*).
- **Quick planning of bell sounds:** simple, intuitive software.
- **Music played via your choice of source:** Possibility of sending all audio file formats to sounder systems, such as WebRadio and WebMusic (as well as CDs, USBs, SD Cards, etc.)
- **Coordination** of the lighting, heating and air-conditioning via the IP relay, controlled by the Sigma master clock.
- **The Harmonys Talk and Harmonys Notify apps** are available free of charge on Apple® and Android™ smartphone.
